

## Technical Data Sheet

**Product:** Glassbeads

**Type of glass:** Borosilicate

**Grade:** LAB10

| Testing Items                                   | Control Standard        | Test Method                  |
|-------------------------------------------------|-------------------------|------------------------------|
| Appearance                                      | White and Good fluidity | Powder flow test             |
| Moisture Content (%)                            | $\leq 0.50$             | Moisture Meter               |
| Particle Size (Typical Value) ( $\mu\text{m}$ ) | D90: 10                 | Laser particle size analyzer |
|                                                 | D50: 6                  |                              |
| Specific Gravity( $\text{cm}^3$ )               | $2.60 \pm 0.1$          | True density detector        |
| pH                                              | 8~9.5                   | pH Tester                    |

Products should be stored in a dry and ventilated environment. Packagings are available in 25kg paper bags or cartons.
